<p>As from 01 May 2009 all containers arriving in the Port of Rotterdam with a too high concentration of gas, will be taken out from the logistic transport chain. (Methylbromide is mostly used toxic gas)</p> <p>According to the Ministry one may expect delays running up to several months before a fumigated container finally will be released to the consignee. Obviously high costs will be involved if a container has a too high concentration of gas.</p> <p>We strongly suggest that you also urge all members world wide (mainly Asia, Africa and South America) to reduce or preferably stop fumigating containers. Do consider the massive impact and consequences this will have on your / our customers!</p>
